

DO NGUYEN MINH SANG

Backend Web Developer

25/04/2003

minhsang5544@gmail.com

Ninh Kieu, Can Tho

0334384090

CAREER OBJECTIVE

- Seeking a Backend Developer Internship to apply my knowledge in database design and backend development, contribute to real-world projects, and gain hands-on experience in system implementation
- Committed to completing the full internship duration and willing to learn new technologies or programming languages as required.

EDUCATION

CAN THO University - Sept 2021 - Dec 2025

Final-year student majoring in Information Systems

Current GPA: 3.6/4

CERTIFICATES

English: Toeic L&R 570

SKILLS

- Business Modeling Tools: PowerDesigner (CDM, LDM, ERD), StarUML (UML diagrams: Use Case, Activity, Class, Sequence), Draw.io (system architecture & flowcharts)
- Database Management: MySQL, SQL Server
- Data Analysis Tools: Weka (machine learning), Tableau (dashboards, data visualization), CloverDX (ETL), Google Colab & Kaggle (data processing, model training)
- Programming Languages: **Python**, PHP, Javascript, C#

PROJECTS

08/2024 - 12/2024

Shoe Store Management System (Education Project)

- Analyzed requirements and designed the system using Use Case Diagram, Conceptual Data Model (CDM) and Activity Diagram..
- Database design for managing products, sales invoices, and employees
- Developed a desktop management application using C# in Visual Studio 2022.
- Developed core management features such as login, logout, and the main functionality for handling purchase invoices

03/2025 - 07/2025

Study Abroad Management System (Graduation Thesis)

- Developed a study abroad consulting website with program information and email-based customer support
- Developed an administration platform to manage study abroad programs, scholarships, applications, and statistical reports for better operational management
- Used OpenCV combined with Tesseract libraries to scan transcripts from images (feature under development, needs further improvement).
- Designed CDM, LDM, Use Case Diagrams, and Activity Diagrams for system functionalities
- Using Django Rest Framework, Python, chart.js and MySQL to develop this project
